WINDOW FILM

Getting Comfortable With
VISTA ENERGY-SAVING FILM

How can applying an
ultra-thin, affordable film
to your home's existing windows
**give you so much
savings and comfort?**

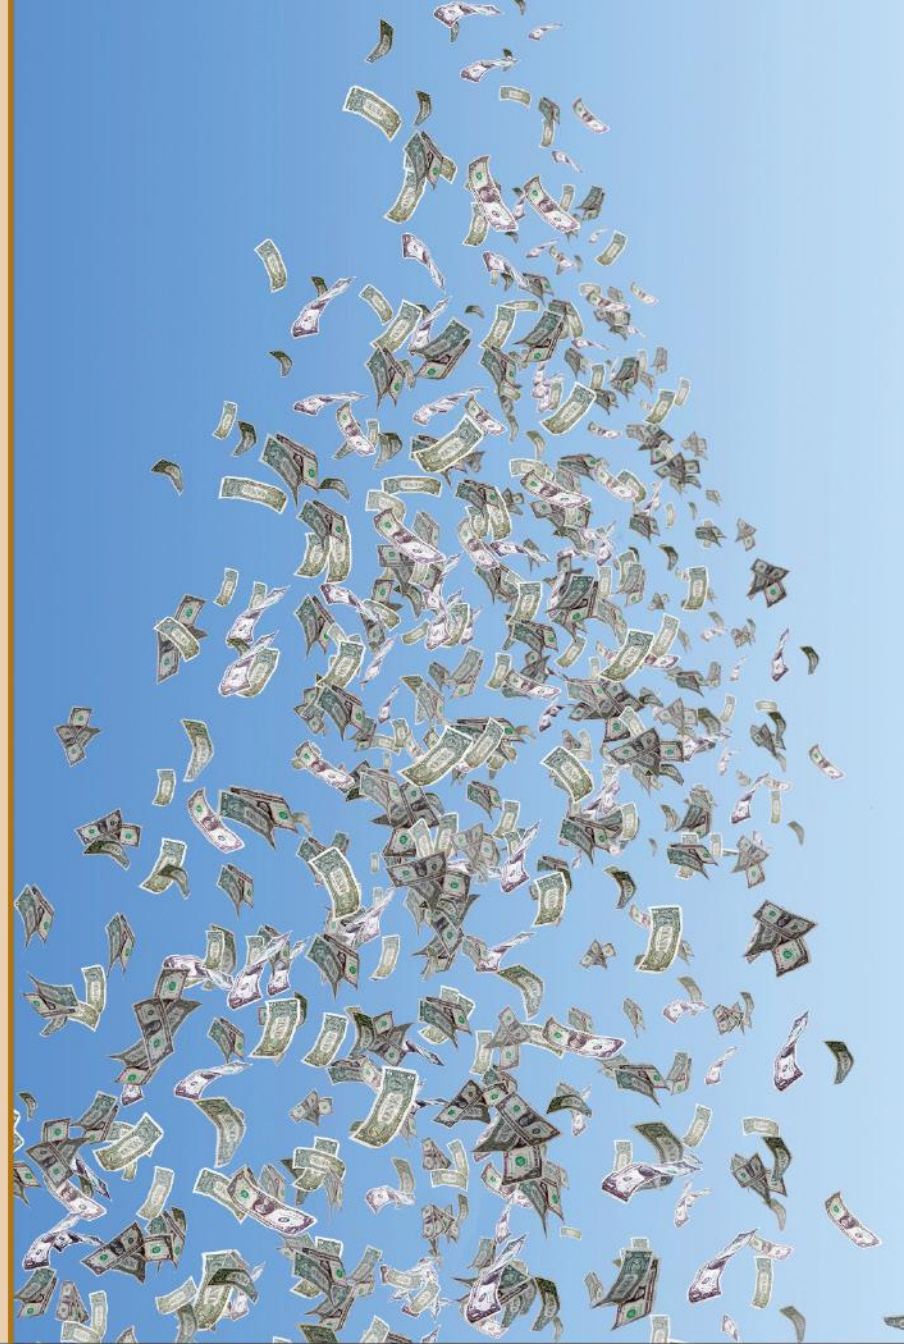

► To answer that question, let's ask another ...

What's the **COST** of doing nothing?

1. Money continues to fly out your windows.

- ▶ In the average home, about 15% of wall space is glass—which is a very poor insulator.
- ▶ The average home wastes \$63 per month on energy ...
- ▶ Which means the average home loses \$760 every year!

SOURCE: U.S. Department of Energy

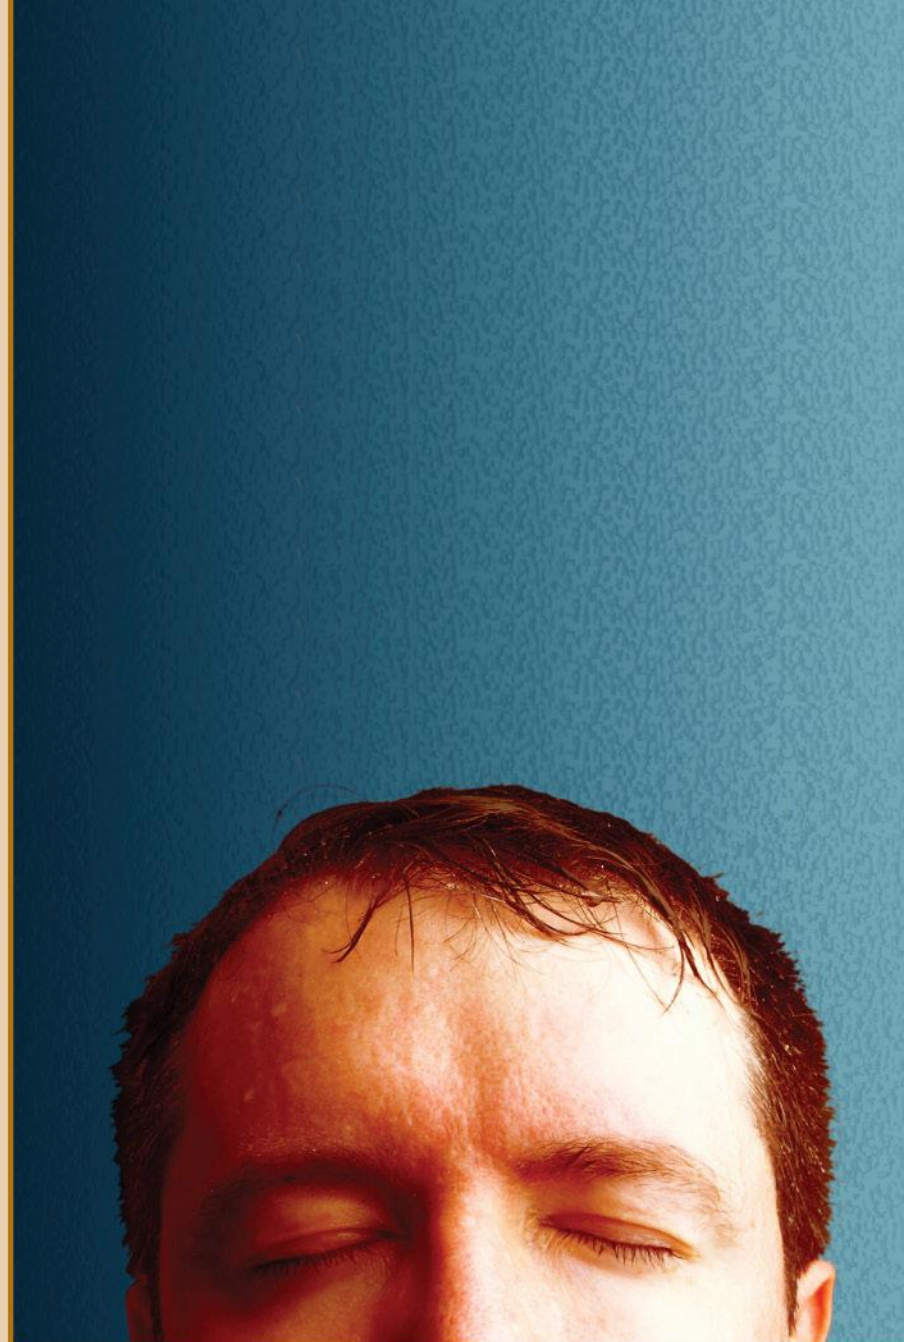

What's the **COST** of doing nothing?

1. Money continues to fly out your windows.

2. Your family continues to be uncomfortable.

- ▶ Solar heat builds up to make rooms **uncomfortably warm.**
- ▶ Too much of the wrong sunlight creates **uncomfortable glare.**

What's the **COST** of doing nothing?

1. Money continues to fly out your windows.
2. Your family continues to be uncomfortable.

**3. Your interior furnishings
continue to fade.**

- ▶ Harmful UV rays damage both finishes and furnishings inside your home.

AREAS UNDER RUGS
OFTEN DRAMATIZE
THE FADING OF
EXPOSED FINISHES.

In the past,
your only alternative
to doing nothing was
installing replacement windows.

- ▶ A typical window replacement job takes multiple days.
- ▶ Rooms become mini-construction sites.
- ▶ Cost is expensive—even prohibitive for many.

Now, advances in technology
offer us a better solution:

Vista Energy-Saving Window Film

- ▶ Enjoy the major benefits of replacement windows;
- ▶ Applies quickly and cleanly to the interior of your existing windows;
- ▶ Faster and less intrusive to install;
- ▶ Easy to clean;
- ▶ All for a fraction of the cost of window replacement!
